S.C.O.T – THE Safety Pass to be recognized as THE orientation program for students, new hires and new entrants to Canada

Your Construction Safety Association of Manitoba is pleased to announce the launch of the Safety Construction Orientation Training, S.C.O.T – THE Safety Pass. S.C.O.T. THE Safety Pass offers a basic, standardized construction safety orientation to both new and returning workers in the industry.

This interactive, online program consists of 13 modules - each focused on a different fundamental aspect of worksite safety. New, returning and future workers will be provided with information on their roles and responsibilities in the workplace, basic knowledge surrounding the identification, assessment, and control of hazards, as well as a basic description of industry specific equipment and tools and how to safely operate them.

Each module contains a series of slides that are rich with content and accompanying visuals, followed by a quiz that tests the participant's knowledge on the topic. In order to successfully pass each module, the student needs to score 100% on the quiz.

Derek Pott, Operations Manager with the Construction Safety Association of Manitoba, is pleased with the offerings that S.C.O.T – THE Safety Pass has for workers preparing to enter the construction industry and looks forward to working with CSAM Members to implement this program as a recognized training standard in Manitoba.

"The Construction Safety Association of Manitoba saw the need for a basic, standardized orientation program for the construction industry and we're pleased to say that S.C.O.T – THE Safety Pass satisfies that need. This program covers basic information for all areas of construction and prepares high school students, new entrants to Canada, new and returning workers with an essential understanding of what a career in construction entails. Bottom line, it sets a benchmark for training" says Pott.

The next step is to implement S.C.O.T – THE Safety Pass as a recognized minimum orientation training standard in Manitoba. Having standardized orientation training – available 24/7 at your fingertips – will benefit employers by creating consistency in training while boosting workplace culture and morale.

To learn more about S.C.O.T – THE Safety Pass and how you can incorporate it into your school curriculum or company's new worker orientation program, contact **Marla Warnick** at marla@constructionsafety.ca or 204-775-3171.

CSAM welcomes new members to Advisory & Divisional Committees

The Construction Safety Association of Manitoba is pleased to announce that the following members have joined the Association's list of Committees:

- **Lanny McInnes, *Manitoba Home Builders' Association*** - Advisory & General Contractors Divisional Committee
- **Gary Rempel, *Newton Enterprises*** - General Contractors Divisional Committee
- **Iris Ingram, *Hollyhock Construction Ltd.*** - General Contractors Divisional Committee
- **Art Letkeman, *Sperling Industries Ltd.*** - Mechanical, Electrical, Manufacturers and Suppliers Divisional Committee
- **Nicole LaFrenier, *Canadian Dewatering LP*** - Mechanical, Electrical, Manufacturers and Suppliers Divisional Committee
- **Anthony Wilson, *Specialloy*** - Trade Contractors Divisional Committee
- **Tony Guerreiro, *Alpha Masonry Ltd.*** - Trade Contractors Divisional Committee
- **Amanda O'Rourke, *Thorpe Construction Ltd.*** - Westman Divisional Committee
- **Rhonda Gruetzner, *Glendale Industries Ltd.*** - Westman Divisional Committee

CSAM's Divisional Committees represent different sectors of the building construction industry – General Contractors; Trade Contractors; Mechanical, Electrical, Manufacturers and Suppliers; and initiatives specific to the Westman area.

These Committees meet on a quarterly basis to discuss prevalent issues, create long-term initiatives that aid the construction industry and receive an update from the Construction Safety Association of Manitoba.

One of the outcomes from the Divisional Committees will be discussion points that are brought to the attention of the CSAM Advisory Committee - which includes representatives from industry, Manitoba Homebuilders Association, the Construction Association of Rural Manitoba, the Construction Safety Association of Manitoba, the Winnipeg Construction Association and the Divisional committees.

Want to join a Committee?

If you work for a CSAM member Company, are a forward-thinking, driven individual with a passion for safety and can make a commitment to contribute your time, ideas and motivation towards a dynamic group of like-minded and equally passionate individuals, then we would love to have you on board!

To sign up, simply contact **Megan Funnell** at megan@constructionsafety.ca or **204-775-3171** and clearly state which committee you wish to join.

All applicants will be contacted within the week to confirm participation and review the upcoming meeting schedule and agenda.

Reward a Safety Champion in your Workplace

The Construction Safety Association of Manitoba will be awarding one individual's dedication and outstanding contribution to health and safety in the construction industry of Manitoba.

If you know someone who demonstrates a commitment to safety in the workplace, acts as an advocate to fellow workers and is employed with a member company of the Construction Safety Association of Manitoba, then we want to hear from you!

Simply download the application form at constructionsafety.ca and submit the completed form, with supporting documentation, by **August 31, 2017**.

Safety Construction Orientation Training

THE SAFETY PASS

Safety Construction Orientation Training (SCOT) - THE SAFETY PASS is an interactive, online-training course composed of 13 modules, each focused on a different fundamental aspect of construction site safety. THE SAFETY PASS is an excellent orientation program for any personnel entering a construction site.

THE SAFETY PASS is convenient, easy-to-use, easy-to-understand, and is interactive and accessible 24/7. Upon completion of the online training, participants will be able to print off a certificate and will also be sent a hard hat decal.

The program provides the basics in construction safety and requires 100% mastery of 13 modules which take approximately two to four hours to complete.

- Workplace Law
- Workplace Hazards
- Managing Worksite Conditions and Equipment
- Personal Physical Care and Conduct
- WHMIS
- Powered Mobile Equipment
- Ladder and Scaffold Safety
- Fall Protection
- Environmental Safety
- Excavating and Trenching
- Defensive Driving
- Personal Protective Equipment
- Emergency Response

Visit www.constructionsafety.ca for more information or call the Construction Safety Association of Manitoba office at (204) 775-3171.

Roofer ‘deliberately choosing to put people at risk’ gets 4-month jail sentence

Written by Cassie Williams, CBC News

A Nova Scotia contractor has received one of the longest jail sentences of its kind in Canada for once again violating the rules of the Occupational Health and Safety Act.

On Friday, Joseph Isnor was sentenced in Halifax provincial court to serve four months at the Central Nova Scotia Correctional Facility in Burnside.

Isnor pleaded guilty to this latest charge in November and now has 10 convictions under the act. Nine of them, including the latest violation, were for failing to ensure his employees were using proper fall protection while working for his company, United Roofing Inc.

This latest violation of the act happened last August in Herring Cove, just three months after he was sentenced to serve 15 days for previous safety violations.

“I hope that it shows that when you refuse to comply with your requirements under the act that the consequences are going to become more and more harsh until the message gets through,” said Alex Keaveny, the province’s special prosecutor for workplace accidents.

4 months off the job

Keaveny said he believes Isnor’s four-month sentence is the longest of its kind in the country for safety violations under the health and safety act.

In addition to the jail time, Isnor is not allowed to work in the roofing industry for a period of four months from his sentencing on Friday. If he is released early, Isnor can’t be working himself, can’t be managing others and his crew can’t work for him until the four months is up.

This further financial consequence will “hopefully provide further incentive for Mr. Isnor to finally comply,” Keaveny said.

‘Choosing to put people at risk’

Isnor must also report all jobs to the Department of Labour and Education for the next two years. Keaveny said that’s similar to a condition expected to be added to the Occupational Health and Safety Act in June that will impose reporting requirements.

“I don’t relish sending anyone to jail but I was glad that the judge agreed that ... Mr. Isnor had a pattern of non-compliance that was pretty significant,” said Keaveny .

“Judge [Marc] Chisholm saw it just like that, that Mr. Isnor is deliberately choosing to put people at risk. He agreed that the consequences have to get more and more severe until the message gets through.”

From 2013 to 2016, 32 people died on the job in Nova Scotia. Seventeen of those deaths occurred in 2013, which led to a provincial safety blitz. There were five deaths in 2014, eight in 2015 and two in 2016.

National Construction Safety Officer (NCSO™) Designation!

An NCSO™ understands basic regulatory requirement and how they apply to a construction site, allowing workers, the public and the environment to function safely together.

An NCSO™ is recognized province to province through the provincial Construction Safety Associations (CFCSA).

An NCSO™ is a valuable resource in the administration and implementation of a company's Health & Safety Program.

An NCSO™ is eligible to challenge the CCA's Construction Safety Coordinator Gold Seal Exam with 5 years experience.
